

ANTON

by openEXPERT · v0.7.5

Local-first AI workspace for professionals whose work gets read by regulators.

MARKETING ONE-PAGER

v1.0 · 2026-05-24

The AI workspace that **holds up in court.**

ANTON runs on your machine, speaks to six LLMs, and produces audit-defensible outputs across 12 pillars and 150+ expert modules. Around it sits the four-app suite and FutureChain — our own payment + identity rail.

01 · PRODUCT

One workspace. Twelve pillars.

Work · School · Life · Pathfinder · Markets · Community · Procure · Civic · Grow · Payments · Portals · Missions.

The four showcases:

Counsel's Desk

22 personas · 8 modes · live citation tracking

Risk Atlas

7-stage deterministic engine · 25 industry packs

Tabular Review

15 playbooks · 10 jurisdictions · share for review

Evidence Pack

Ed25519-signed audit bundles · AMLR/GDPR/DORA

"The AI is a powerful intern; the workspace is the professional."

02 · THE SUITE

Four apps. One ANTON.

Each app is a separate APK, separate identity, separate purpose. Same chevron design language.

Companion

Desktop ANTON on a phone. Approvals, voice, capture.

Business

FC merchant POS. No backend.

Pay

Customer scans, pays in FTC, gets receipt.

Comm

Chat, events, social. Separate identity.

Companion = enterprise wedge. Biometric-gated, Ed25519-signed approvals from the lift.

03 · FUTURECHAIN

The payment + identity rail.

ISO 20022 messaging, tax across 27+ jurisdictions, Ed25519 throughout. Closes Layer 6 of the vision.

PACS.008 builder

Structured, signable payment artifacts (not wire strings)

Wallet · RPC

Phone-resident Ed25519 keypairs · batch submission

Tax engine

FIFO/LIFO/avg/share-pooling · 27+ jurisdictions · K4

Mesh dialer

ANTON-to-ANTON · Noise IK + WireGuard cipher suite
